

# Three-Card Layouts

*Since there are so many options for Three-Card layouts, this overview starts with a meta-explanation, so you can create and use your own approach. We'd love to hear about it!*

A beginning point (the essence of your position)

A bridge (expanding your vision or diving more deeply into something)

A change (looking forward into the future and choices to be made)

Possibilities for your own readings could include (for example): past/present/future, body/mind/spirit, desire/conflict/resolution, problem/action/outcome, or even Thesis/Antithesis/Synthesis.

For these layouts, it's up to you whether you use a specific, separate card as your signifier. You can also organize the cards in any order that works for you. Bright blessings on your journey!
